Backpack or Electric Sprayer

1/8 acre (5445 sq. ft.) Mix 3–4 ounces of Avian Control® with 1-1.5 ounces of liquid dishwashing detergent (Dove, Palmolive or similar) and add to one to two gallons of water.

1/4 acre (10890 sq. ft.) Mix 6–8 ounces of Avian Control® with 2-3 ounces of liquid dishwashing detergent (Dove, Palmolive or similar) and add to two to four gallons of water.

1/2 acre (21780 sq. ft.) Mix 12–16 ounces of Avian Control® with 4-6 ounces of liquid dishwashing detergent (Dove, Palmolive or similar) and add to four to eight gallons of water.

1 acre (43560 sq. ft.) Mix 24–32 ounces of Avian Control® with 8-12 ounces of liquid dishwashing detergent (Dove, Palmolive or similar) and add to eight to sixteen gallons of water.

Air Blast or Boom Sprayers

Apply per label instructions using 24 to 32 ounces of Avian Control® per acre with 25 to 100 gallons of water.

Tank Mixing

Avian Control® Bird Repellent may be mixed with other agricultural chemicals. Prior to mixing, blend a small amount of Avian Control® with the other chemical in a jar of water to determine if they are compatible.

DO NOT mix Avian Control® with chemicals that have a pH below 7.0, as this may reduce the effectiveness of Avian Control®.
