SpectrumV™ Holographic Bird Gel™ is an easy, economical, and effective sensory bird control solution. Each easy-to-apply dish contains an innovative gel that uses a combination of sight, sense and smell to keep birds away from edges, ledges, and more!

**SIGHT**
Holographic reflection technology creates visual hot spots that scares birds away.

**SENSE**
When touched, birds do not like the sticky sensation on their feet, encouraging them to leave the area.

**SMELL**
Proprietary blend of ingredients creates an aroma that is unpleasant to birds - an instinctive bird deterrent.

SpectrumV™ Holographic Bird Gel™ is used to deter sparrows, pigeons, gulls, crows, starlings, woodpeckers, and other bird species from buildings and structures.

**Installation**
For surfaces and ledges, 5” wide or less, space dishes every 8”. For surfaces and ledges greater than 5” in width, additional rows of dishes may be required.

### Advantages & Benefits
- Ideal for commercial and residential use
- Easy, economical, and effective
- Effectively deters all bird species*
- Protects edges, ledges, and more!
- Low-cost humane solution
- Tri-sensory bird repellent action
