Transparent Bird Gel Installation Instructions

Transparent Bird Gel - a sticky non-toxic gel used to keep pest birds off of flat surfaces. The Bird Gel creates a sticky surface that birds cannot stand, and is effective for pigeons and starlings.

Applications:

- Ledges
- Parapet Walls
- Pipes
- I-Beams
- Conduit
- Flat or Curved Surfaces

Specifications:

- Non toxic, safe for humans and animals
- Bird Gel comes in standard 10 oz caulking tubes, 12 tubes per case
- Each tube covers 10 feet x 3 inches wide
- Each Case covers a total of 120 feet!
- Effective at wide temperature range: 15F – 200F
- Gel will last up to 6 months outdoors

Installation:

- Transparent Bird Gel comes in a standard 10 oz caulking tube, and requires a caulking gun for application.
- Before applying, the surface should be cleaned and dry, with no loose debris.
- Apply the gel in a “zigzag” pattern about 3” long leaving periodic spaces for water drainage.
- Do not use bird gel where birds have been nesting
- Bird Gel is only to be used on flat surfaces.
- Put painter’s tape down to protect surfaces.

Clean-up / Removal:

To remove the bird gel, use mineral spirits, a solvent that can be found at most local hardware stores.
